Letter To Editor
DENVER NEGRO OBJECTS
TO STREET DEMONSTRATIONS

Editor:
The evidence to many that news which sells is not always good news, and the present demonstrations, arrests, and dramatics in parts of our nation which could well spread over the entire country is no exception.

True; the employees of newspaper associations must live; the coffers somehow must be filled, but why at the expense of the giddy multitude who seemingly can't tell left from right?

The best news is still free. That news has the power to change not only the ugly picture and plight of our country at home, but also abroad. Not to speak of the heart of the inhabitants thereof. Such was the God, concerning His Son, the Lord Jesus Christ, who came into the world to save sinners. Who is the good Shepherd who laid down his life for the sheep. "Greater love hath no man than this, that a man lay down his life for his friends."

While many of the leaders of the integration find labor, and in many conditions in general remain the same, men just can't seem to get along with one another, and the Lord Jesus Christ, who made peace through the blood of his cross, as the least sought after by the masses.

In spite of those who have already given their lives for such, the efforts of legislators and law enforcers, the monies spent, the cause is yet to come. "For a kingdom divided against

itself is brought to desolation." As a Negro seeking not sanction, sympathy, sensationalism, or the often sought for silver-lining, but who knows that the Lord Jesus Christ is a one the answer in a day when many make the issue skin when they really sin; would simply beseech my fellow-traveler to eternity to be reconciled to God who is no respecter of persons.

Prayerfully submitted

How many ways does exercise help your child?

We're all aware of the more obvious benefits of exercise—to develop strength, skill, agility. But exercise has other important benefits. For instance, it is good for the heart and blood vessels. Indeed, daily, vigorous activity may be the most important factor in preventing or delaying heart disease. Moreover, the better a youngster's physical condition, the more likely he is to do well in his studies. And the physically fit boy or girl certainly measures up to challenging or competitive situations with a sureness that the under-developed child often lacks. Don't you agree that your child should have both the immediate and the long-range benefits of exercise? Won't you see to it that his school has a daily program that can improve every child's fitness? think BIG!

OUR FOREFATHERS DID. And from their dreams grew the strongest, most prosperous country the world has ever known. One big reason for this was railroad transportation — vital then, as now, to America's growth, economy and defense.

competition be substituted for present unnecessary regulation of reductions in freight rates on agricultural and bulk commodity. This also will improve the competitiveness of American products against foreign products at home and abroad.

Now for the big thought! Today, American consumers are being cheated out of several billion dollars annually by artificially high freight rates. Rates kept high by regulation which kills off real competition. Congress can let consumers keep this now-wasted money in their pockets — available for constructive spending. How? By passing legislation re-

It's a big thought, all right — as big as America's consumers. The lawmakers of the country should have the foresight and courage to correct this sorry situation.
